# Salon Ambience

## project design

In order to use the service provided by our Design Centre you should send, by fax, e-mail or post, the dimensions and essential measurements of the salon (as demonstrated in the example below). This information is studied by a team of architects and project designers, who carefully prepare your project ready for the next phase, resulting in a computer aided design of the salon.

Necessary information with each design includes:

- A plan with clear measurements in metric, or, alternatively, a plan in scale 1:20, 1:50, 1:100 or 1:200.
- Clear labelling of water inlet and outlet pipes.
- Clear labelling of entrance and all doors and windows.
- Positioning of bathroom and, if necessary, staff room.
- Positioning of any pillars and / or any immovable structures, including radiators, boilers etc..

Included below is an example design, showing which measurements are needed in order to create a project.

Again, we hope this information is beneficial to you, and that it results in a faster, more efficient service from us, helping to create the salon that you and your customer desire.

**N.B. Please allow 5 working days for completion of a design.**
